

```
import jsonschema from 'jsonschema'

function test(value: unknown) {
  const schema = {
    type: 'object',
    properties: {
      name: { type: 'string' },
      ...
    },
    required: ['name', 'version', 'plugins'],
  }

  const result = jsonschema.validate(value, schema)

  if (!result.valid) {
    return
  }

  return result.instance
}
```
