

```
function getConfig() {  
  return {  
    env: 'dev',  
    url: 'api.typescript.dev'  
  }  
}
```

```
export type Config = ReturnType<typeof getConfig>
```

```
const config = getConfig()
```

keyof/typeof Operators

```
const a = { value: 'test' };  
type A = typeof a; // { value: string }
```

```
const b = { value: 'test' } as const;  
type B = typeof b; // { readonly value: 'test' }
```

```
const c = { a: 1, b: 2 };  
type C = keyof typeof c; // 'a' | 'b'
```
