yup
No tree-shaking

hmmm

No TypeScript support

v8n

jsonschema

```
import joi from 'joi'

function test(value: unknown) {
  const schema = joi.object({
    name: joi.string().required(),
    optional: joi.string().optional(),
    version: joi.number().required(),
    plugins:
      joi.array().items(joi.string().required()),
  })

  const result = schema.validate(value)

  if (result.error) {
    return
  }

  return result.value // any
}
```
