```typescript
import v8n from 'v8n'

function test(value: unknown) {
  const schema = v8n().schema({
    name: v8n().string(),
    optional: v8n().optional(v8n().string()),
    version: v8n().number(),
    plugins: v8n().array().every.string(),
  })

  const errors = schema.testAll(value)

  if (errors.length) {
    return
  }

  return value // unknown
}
```

```typescript
import yup from 'yup'

function test(value: unknown) {
  const schema = yup.object({
    name: yup.string().required(),
    optional: yup.string().optional(),
    version: yup.number().required(),
    plugins:
yup.array(yup.string().required()).required(),
  })

  const result = schema.validateSync(value)

  return result // any
}
```
